

HIPAA Compliance & Your Data

How can you ensure that the personal health information of your patients is kept secure, confidential and unaltered?

24/7 cyber-threat monitoring is critical for such a task!

Protect your data and ensure a successful compliance audit

- **Prevent Abuse in Real Time** - user access to systems is recorded and monitored. (Section §164.308 (a)(5))
- **Review and Audit** - access logs and records of information system activity are collected in real-time and reviewed by advanced technology as well as human security experts. (Section §164.308 (a)(3))
- **Audit Control** - Implement and maintain proper audit control of hardware, software and information systems. (Section §164.312(b))
- **Log Archival** - Secure storage of the event logs for review, forensics, and reporting

24/7 Monitoring

Continuous cyber-monitoring of your environment. So while you sleep, we keep a watchful eye!

Human Expertise

Every security event identified by the cloud-based, 24/7 cyber-threat detection engine is viewed and evaluated by a trained cyber-security expert.

Status Reporting:

Executive-level and in-depth technical reports provide a view of the number and type of threats your network is facing.

Our service enables organizations to effectively secure their IT infrastructure and maintain compliance. Our real-time 24/7 Threat Detection and Remediation service provides:

- Analysis of logs for incidents, including log-in/log-out
- Analysis of user behavior and activity on sensitive systems
- Detection of cyber-threats (internal or external)
- Human-inclusive remediation
- Retention of logs for forensics, legal and compliance requirements.
